

تَنْوِين

Tanween

Brand standards

A judging tool for Qur'an competitions, and the short set of rules that keep it looking like one thing.

EDITION ONE
SEPTEMBER 2026
TANWEEN.APP

One stroke over a letter is a vowel. Two strokes is a tanwīn, and the word ends differently.

That difference is the product. A judge noticing something is one mark. A mark written against a letter, signed, timed and open to appeal is a result somebody can argue with.

So the logo is the fathatān: two strokes and the line they sit on, drawn at the angle the 1405 mushaf uses, close enough together to hold as one shape at the size of a browser tab.

The word is short, it is the same in Dhivehi and in Arabic, and a judge in Malé and a sponsor reading English say it the same way.

تَنْوِين

Three sections

Read the first one before putting the logo anywhere. The rest is reference.

1	The mark	04
	How it is drawn, how much room it needs, and the ways it gets broken.	

2	The system	11
	Ink, paper, the four criteria colours, the dark theme, the type.	

3	In the product	17
	The same rules on the screens judges actually use.	

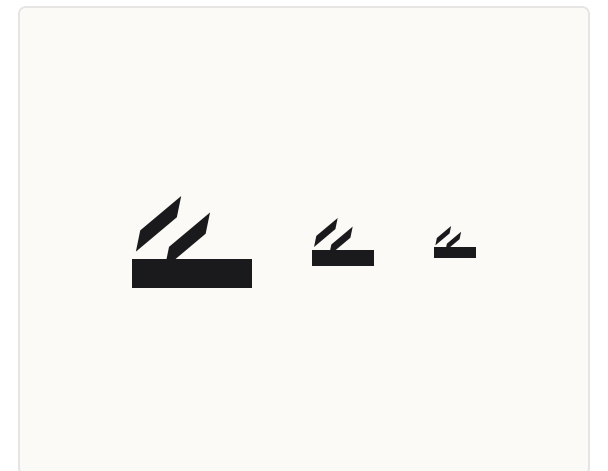

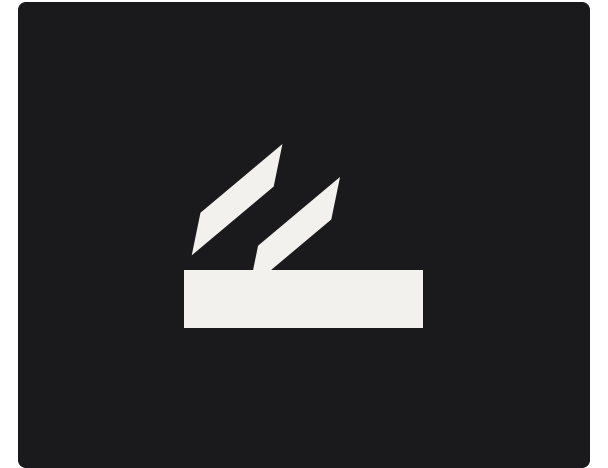

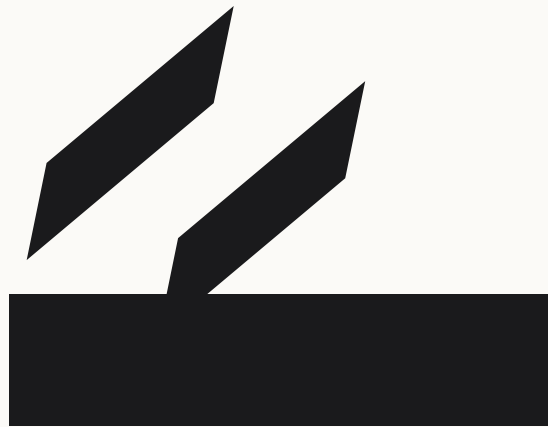

1

The mark

Two strokes cut at one angle, and the line they sit on.
Everything in this section is fixed.

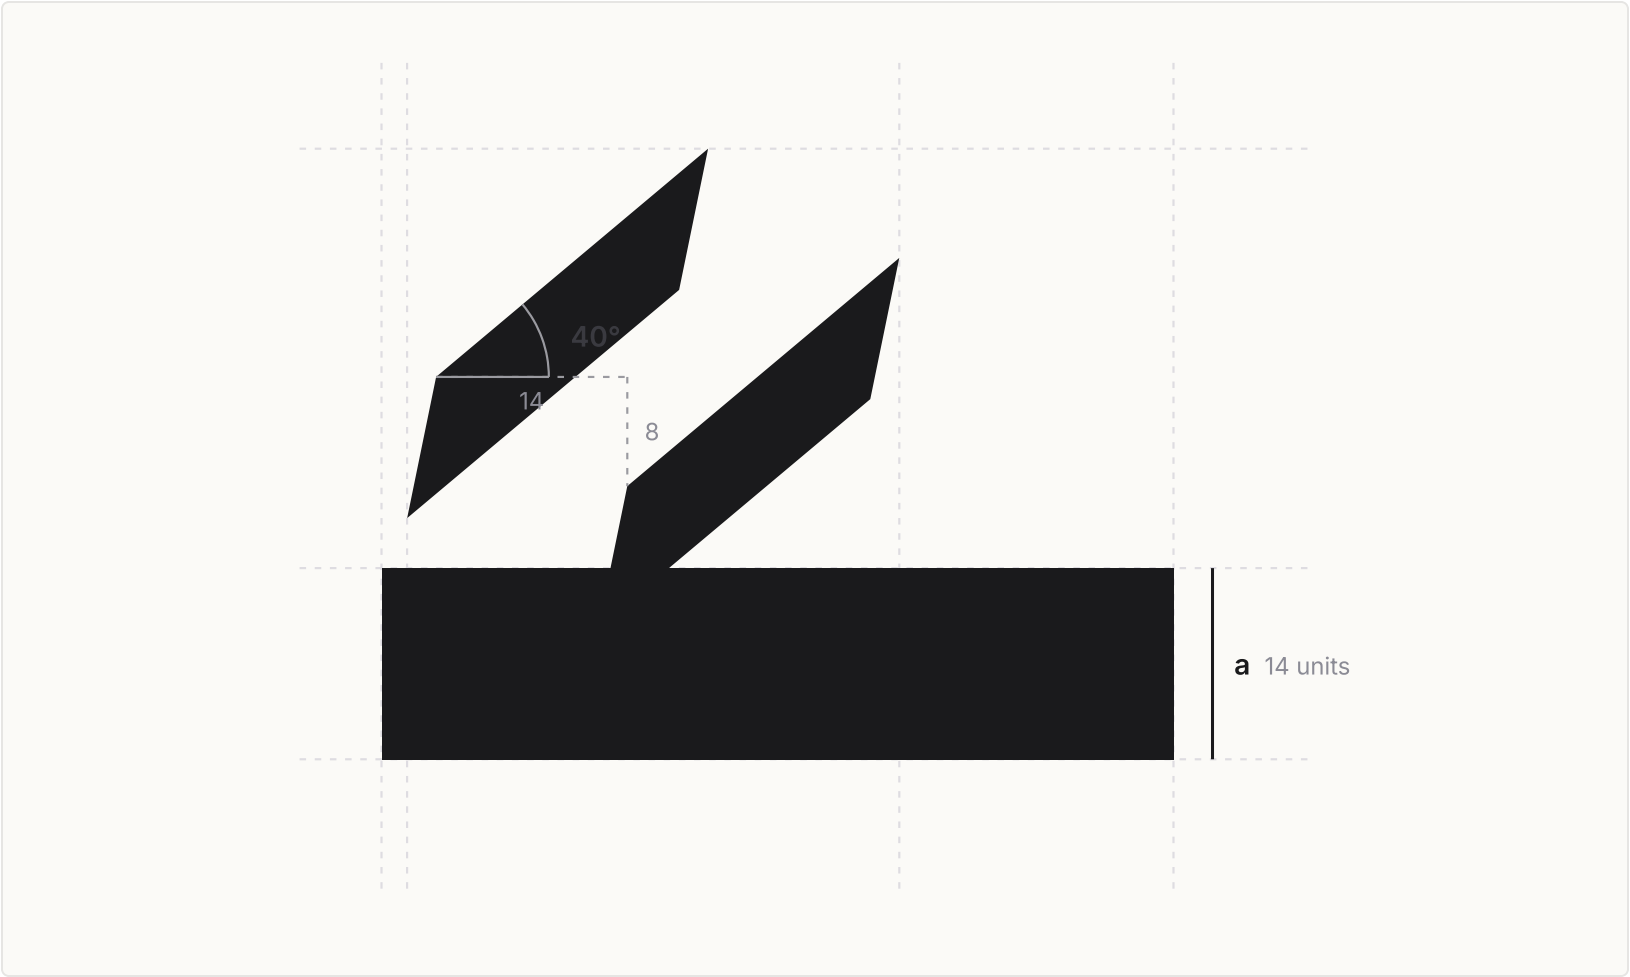

The mark

The fatḥatān on its letter line. It is used as supplied, in one colour, with nothing around it.

Construction

One pen, one angle, used twice.

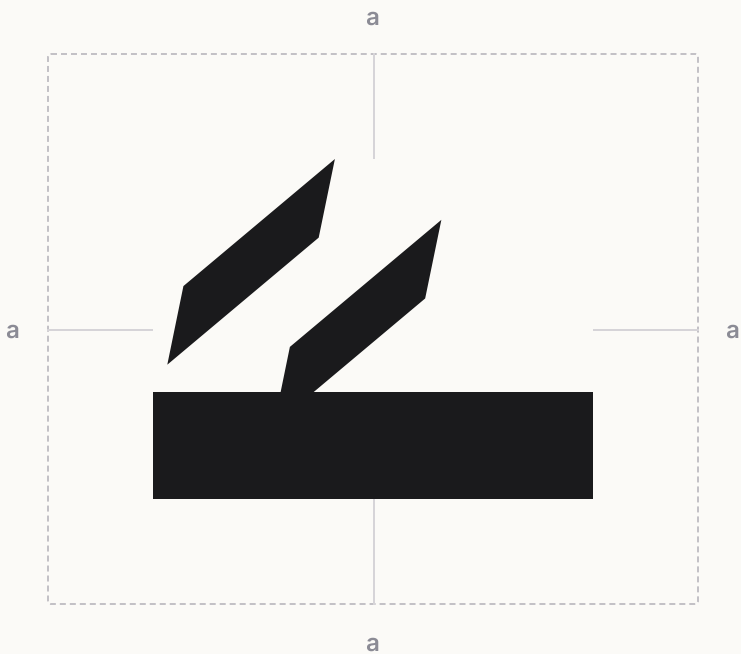

STROKE	26 long, 13.5 thick, cut at 40°
NIB	both ends sheared 0.80 of the stroke thickness, so every edge belongs to one pen
OFFSET	the second stroke sits 14 across and 8 down from the first
LINE	58 by 14, squared off, the same weight as the strokes
FUSION	the lower stroke runs 4.3 into the line; they are one shape, not two
POSITION	the line reaches 1.9 past the strokes on the left and 20.1 on the right

Units are the artwork's own. Scale the file; do not set the shapes again by hand.

Clear space

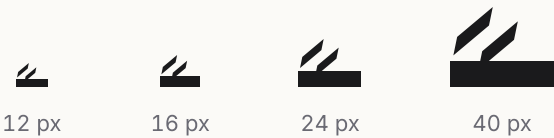

Measured from the letter line, so it scales with the mark and needs no table.

ONE A

a is the height of the letter line: 14 units, or 31.3% of the mark's height. Leave one a clear on all four sides. No rule, no caption, no second mark and no photograph edge comes inside it.

SMALLEST SIZES

At 12 px the two strokes close up. 16 px is the floor for the mark on its own, 120 px wide for the lockup.

The lockup

Mark and name, at one ratio, in one arrangement.

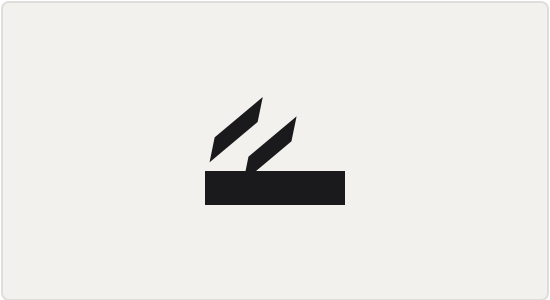

NAME	set at the mark's height, InterVar 600, tracking -0.032em
GAP	1¼ a, measured from the line's right end to the T
BASELINE	the name sits on the letter line, not on the strokes
MINIMUM	120 px wide; below that use the mark alone

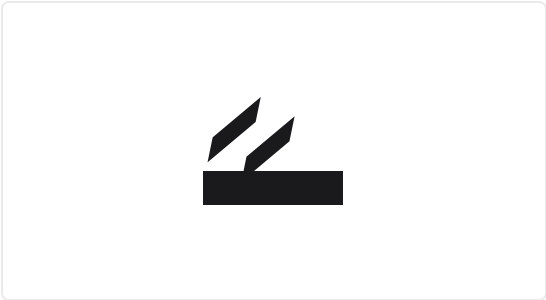

There is one lockup. The mark never sits above the name, and the name is never set in anything but InterVar.

Backgrounds

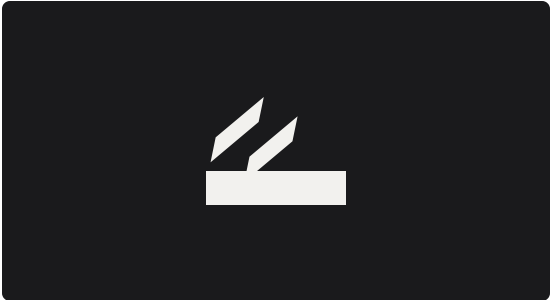

Ink on paper, or paper on ink.

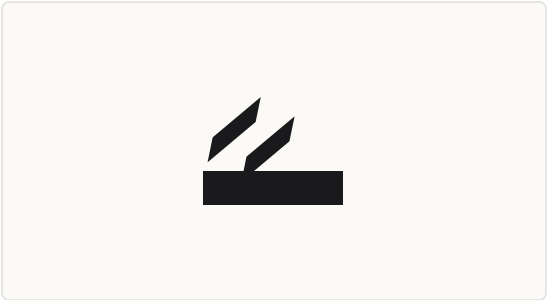

PAPER
--bg, the app ground

SURFACE
--surface, cards and dialogs

INK
--ink, covers and signs

PAGE PAPER
--page-paper, the mushaf sheet

ON A PHOTOGRAPH

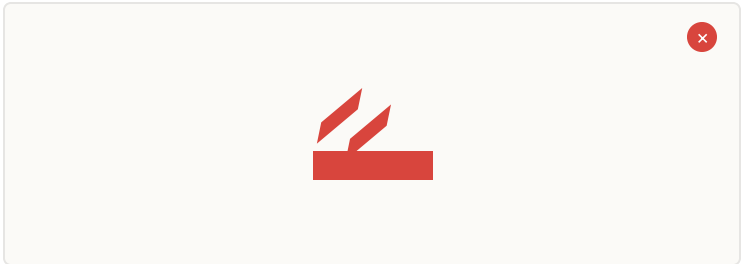

Only where the area behind the mark is flat and the contrast against it is 3:1 or better. If the picture is busy, put the mark in a plain band at the edge instead of over the image.

NEVER A THIRD COLOUR

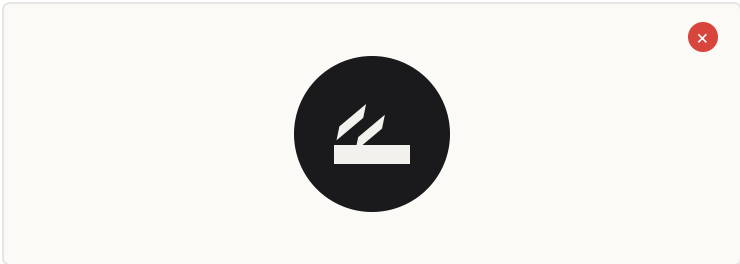

The mark is ink or paper. It does not take a criteria colour, a tint, a gradient or a shadow, and it is never knocked back to grey to sit quietly next to something else.

What breaks it

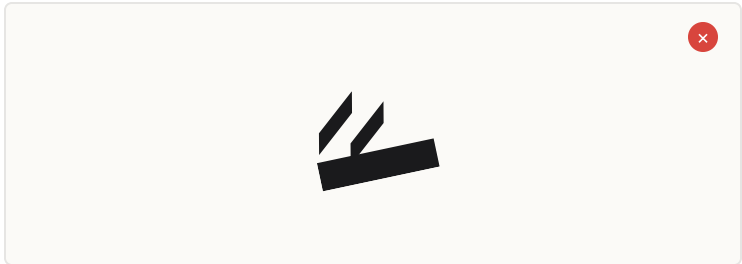

Six things that turn up in every project. None of them is a preference.

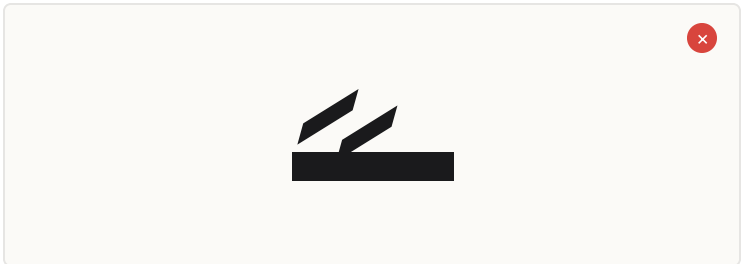

Recoloured. The four colours belong to the criteria and say something about a recitation.

Put in a container. The mark has no roundel, badge or seal.

Rotated. It sits level, always.

Stretched. Scale both directions together.

Outlined. It is a solid shape cut by a pen, not a line drawing.

Reset in another face. The name is InterVar 600 at the mark's height.

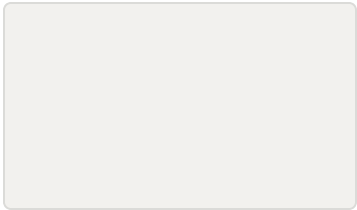

2

The system

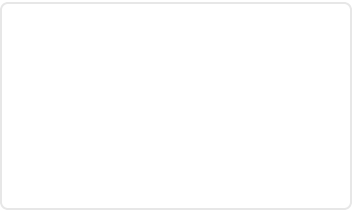

Near monochrome, so that the only saturated things
on a screen are the four judging criteria.

Ink and paper

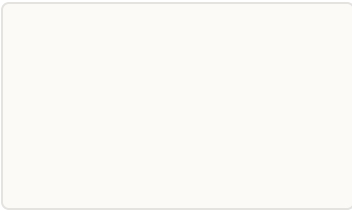

Six values carry the whole interface.

Paper
#f2f1ee
--BG
Everything the app sits on.

Surface
#ffffff
--SURFACE
Cards, dialogs, the score panel.

Page paper
#fbfaf7
--PAGE-PAPER
The mushaf sheet only.

Ink
#1a1a1c
--INK
Text, the mark, and covers.

Ink 2
#62626a
--INK-2
Secondary text. 6.04:1 on surface.

Ink 3
#6a6a73
--INK-3
Labels. 5.35:1 on surface, 4.74:1 on paper.

WHY SO LITTLE COLOUR

The app is near monochrome so the only saturated things on a screen are the four criteria. A judge glancing at a page should be able to tell a marked letter from an unmarked one without reading anything.

THERE IS NO BRAND GOLD

#b3892f exists in the app, in three places, and it draws the sajdah mark on the mushaf page. It belongs to the page, not to the logo, and it is close enough to Laḥn Khafī that using it as a brand colour would read as a judging colour.

HAIRLINES

rgba(26,26,28,.08) for a divider inside a card, .16 for the edge of one. Boxes are separated by a line, not by a shadow.

The four criteria

The only saturated colours in the product, and the only ones that mean anything.

● Lahñ Jalī #d8453d · 50 marks a clear mistake: a wrong letter, a wrong vowel, a skipped word	● Lahñ Khafī #c0892a · 30 marks a hidden mistake: a shortened madd, a missed ghunnah	● Faṣāḥa #5566e6 · 10 marks delivery: pace, breath, where the reciter stops	● Adu / Raagu #377b60 · 10 marks voice and melody, judged over the whole recitation
--C	--C	--C	--C
--C-STRONG	--C-STRONG	--C-STRONG	--C-STRONG
--C-TINT	--C-TINT	--C-TINT	--C-TINT
--C-WASH	--C-WASH	--C-WASH	--C-WASH
--C-WASH-STRONG	--C-WASH-STRONG	--C-WASH-STRONG	--C-WASH-STRONG

WHERE THEY APPEAR

The dot and the name in the score panel. The dot and the name in the mistake log. The wash on a letter that has been marked. The three chips in the mark picker. Nowhere else.

WHERE THEY NEVER APPEAR

The results table, the participant list, the logo, and any chart that is not counting marks.

COLOUR IS NEVER THE ONLY SIGNAL

Every marked state is carried by the word as well as the colour, so it survives a colour-blind reader and a washed-out projector.

WHY THIS GREEN

A filled chip is lettered in white, so the colour has to carry it. #2e9e83 measured 3.32:1 and failed. #377b60 is 5.04:1.

Dark

The same system at night. Nothing is inverted by accident.

SURFACES

Ground
#131316
--BG

Surface
#1c1c20
--SURFACE

Page paper
#211f1c
--PAGE-PAPER

Ink
#ebebed
--INK

Ink 2
#a4a4ac
--INK-2

Ink 3
#8b8b95
--INK-3

The dark theme is 44 rules in the stylesheet, not a filter. Halls are dim and phones are held low, so the ground drops to #131316 and the paper of the mushaf page stays warm at #211f1c.

CRITERIA IN THE DARK

Laḥn Jalī

#f0a8a2

Laḥn Khafī

#e6c07a

Faṣāḥa

#aeb8f6

Adu / Raagu

#a5cfbc

The dot keeps its light value. Only the text tint changes, because #9e2820 on #1c1c20 is unreadable and a lighter dot would stop matching the wash on the page.

THE MARK

Paper on ink. Never grey, never half opacity.

Type

One sans, one Qur’anic face, six sizes.

InterVar

shipped at public/fonts/InterVariable.woff2

Laḥn Jalī Laḥn Khafī Faṣāḥa Adu / Raagu 0123456789

27	Display	--T-DISPLAY	one number on a screen turned toward a reciter
21	Title	--T-TITLE	a participant name, a page title
17	Lead	--T-LEAD	the first line of a card
15	Body	--T-BODY	everything a judge reads while judging
14	Small	--T-SMALL	table rows, meta lines
12	Micro	--T-MICRO	the smallest size allowed anywhere

Whole pixels only. The half pixel sizes this replaced came from nudging one screen at a time, which is why no two of them agreed.

THE QUR’AN FACE

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

KFGQPC HafsUthmanic, 1405 layout. Qur’anic text is never set in a UI face, never restyled, never retyped by hand. On the mushaf page the app loads the King Fahd page fonts, one file per page, so the line breaks match the printed copy.

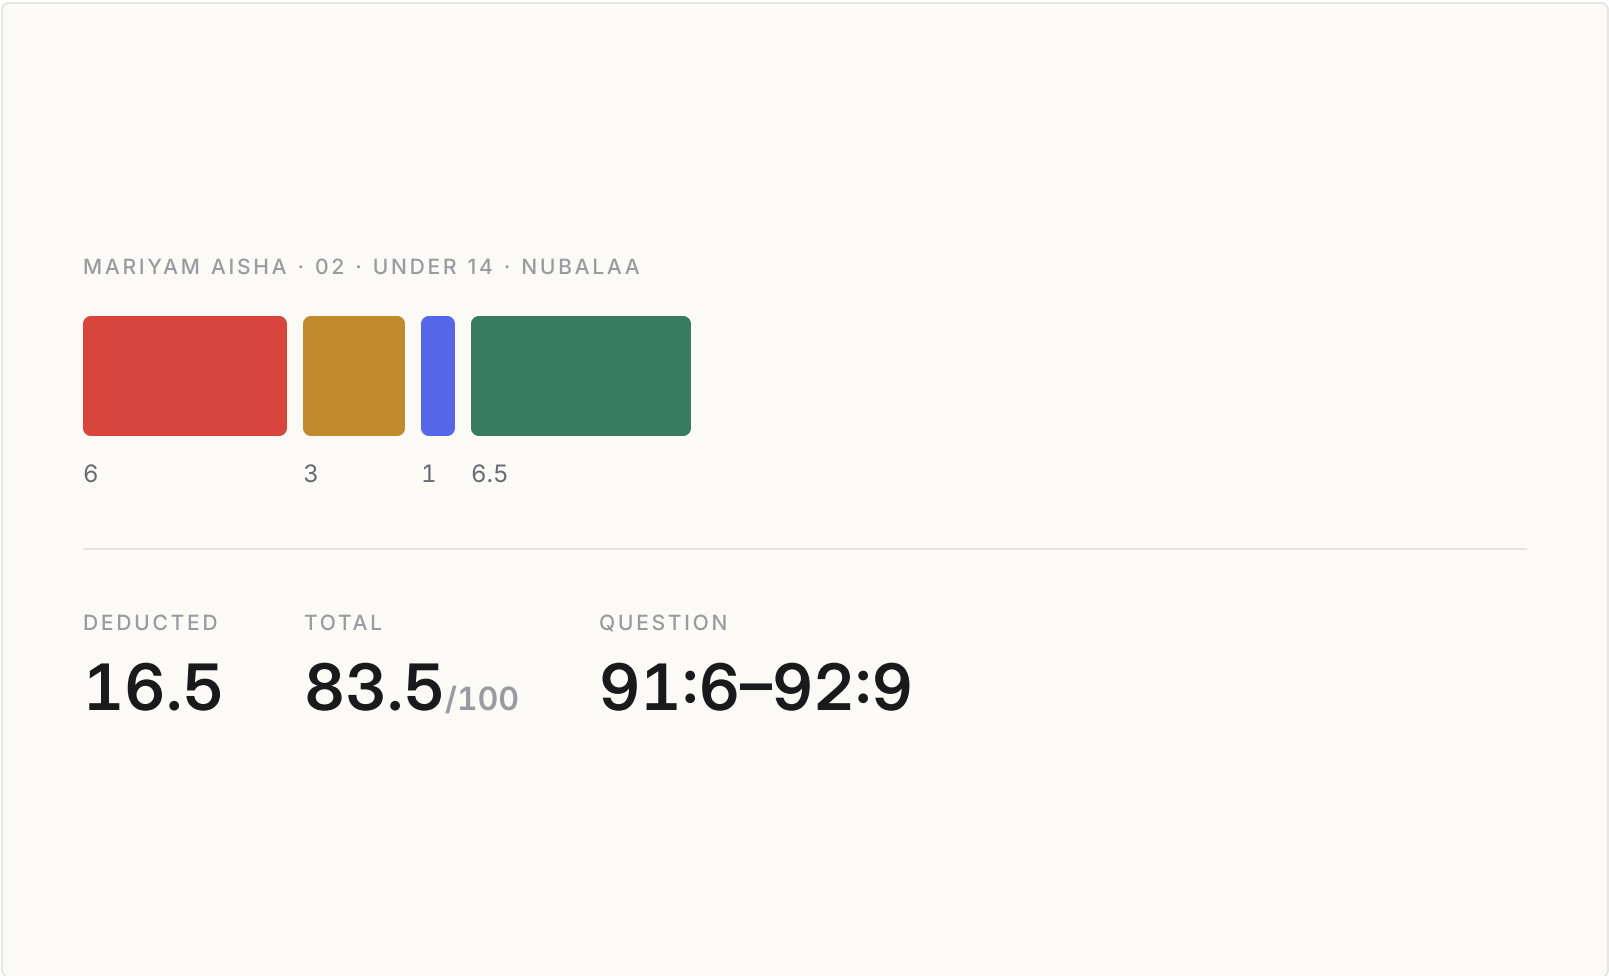

WE TESTED ATKINSON HYPERLEGIBLE

Laḥn Jalī · Faṣāḥa

It has no ḥ and no ṣ. Both families, every subset. The browser quietly borrows those two letters from another typeface, and three of the four criteria names end up set in two faces at once. Inter's ss02, which it calls Disambiguation, gives the slashed zero and the tailed l that Atkinson is wanted for, in a font that has the letters.

The tally

The four colours together, once, and only against real marks.

WHAT THE BARS ARE

Marks deducted, one bar per criterion. Six off Laḥn Jalī, three off Khafī, one off Faṣāḥa, six and a half off Adu / Raagu. The four add up to 16.5, which is exactly what came off the hundred.

HOW IT IS DRAWN

One mark is one unit of width. The bar is three and a half units tall and the gap is half a unit, so the whole thing scales from one number. The order is fixed: Jalī, Khafī, Faṣāḥa, Adu / Raagu, left to right, whether or not a criterion took anything.

THE RULE

Draw it only from a real sheet. Four equal blocks with no recitation behind them is decoration, and decoration in these four colours is a claim about somebody's recitation that nobody made.

WHERE IT BELONGS

Covers, certificates, a results poster, the head of a summary page. This is the one piece of the identity that is not in the app yet, and it is built from numbers the app already holds.

3

In the product

The screens judges use. Everything here is a drawing of what the app does today.

Judging

Press a word, choose the letter, choose the criterion. That is the whole interaction.

Press the word

A press under half a second opens the tray under the word it came from.

ONE CRITERION, ONE GESTURE

When a judge owns only one criterion, dragging from the word to a letter and letting go records it without opening anything.

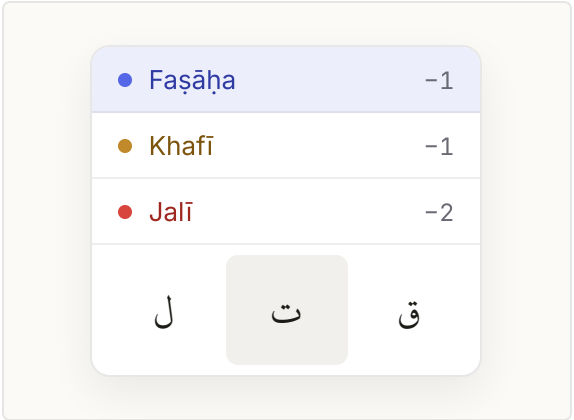

Choose the letter

The tray offers only the letters in that word. The mistake is against one of them, not the word.

UNDO IS PART OF THE RECORD

Every mark opens into one line: the word, the reference, the amount, and Undo. A removed mark leaves the log; it does not disappear from it.

Choose the criterion

The amount comes from the competition's own scoring, so the judge picks a name, not a number.

NOTHING IS COLOURED UNTIL IT IS JUDGED

Holding a word is not yet a verdict, so it stays neutral. Colour on the page belongs to the criteria alone.

The record

What a result actually is: a list of letters, each with a name against it.

ONE LINE PER MISTAKE

The word as it is printed, the criterion, the exact letter, who marked it and which revision it belongs to. A mark outside the recorded question says so on its own row rather than being dropped.

NOTHING HERE IS A SUMMARY

The score is not stored. It is added up from these rows, so changing a source changes the total and the recorded question with it.

COLOUR IS THE CRITERION

The dot and the name carry it. The amount, the reference and the judge stay in ink, because they are facts rather than judgements.

PRINT

This screen is what a printed result sheet copies, in the same order, with the mark added at the head.

TANWEEN · BRAND STANDARDS

NO COLOUR ON THIS SCREEN

A results list is a list of people, not of mistakes. The criteria colours stay inside a record, where a colour still means something; here everything is ink.

FILTERS ARE CHIPS, SEARCH IS A FIELD

The counts live in the chips so an organiser can see what is left without opening a filter.

NUMBERS ARE TABULAR

Every score, total and reference is set with tabular figures so a column of them lines up. 83.5 and 88 sit on the same decimal.

PRACTICE DATA IS LABELLED

Sample competitions carry a Practice badge and their exports say so in the filename. Nothing in the identity is ever used to make demo data look official.

On paper

Certificates and result sheets carry the same record the screen does.

● Laḥn Jalī	إِنَّ	92:4 · letter 1	–2
● Laḥn Khafī	وَأَتَّقَى	92:5 · letter 2	–1
● Laḥn Khafī	فَأَمَّا	92:5 · letter 3	–1
● Laḥn Jalī	فَسَّ...	92:7 · letter 1	–2
● Faṣāḥa	مَنْ	92:8 · letter 2	–1

Printed 13 September 2026 · revision 1 · every row on this sheet is in the app.

- THE LOCKUP GOES TOP LEFT
- On anything printed, at the same size as the running head, with one a of space under it.
- A CERTIFICATE CARRIES THE RECORD
- The score, the question, the number of marks and the judge. A certificate that only shows a number is not something a parent can ask a question about.
- PAPER IS WARM
- Print on uncoated stock. #f2f1ee was picked against paper, not against a white screen.
- COLOUR SURVIVES A PHOTOCOPIER
- The criterion is named as well as coloured, so a black and white copy still says which mistake it was.

JUDGE

Hassan Yoonus

All four criteria

SEAT 01 · HALL A

READ AT THREE METRES

Set the letter line no thinner than 20 mm. Below that the strokes close up and the mark reads as a slab.

HALL LETTERS ARE ARABIC

أ ب ج د, matching the signage a Maldivian competition already uses. The mark appears once per sign, at the top.

THE DOTS ON A BADGE

Four dots means the judge owns all four criteria. Two dots means two. It is the same strip the app puts above the score panel.

Where this document and the code disagree, the code is right.

Every value in here was read out of `src/styles/global.css`, and every screen was drawn from the app running with its practice competition loaded. When a token changes, this document is out of date the same day. Fix it here rather than repeating the old number.
